

PROCEDURE FOR TEMPORARY HYDRANT USE

To prevent damage, the following procedures are required for non-emergency use of fire hydrants:

1. Obtain written authorization for use of hydrant from the Calgary Airport Authority, Manager Mechanical Facilities, 403.735.1470 or Calgary Airport Authority Plumber, 403,735.1330.
2. Use approved adaptor and valve on outlet of hydrant – do not use hydrant valve for routine opening and closing. Open hydrant fully after installing approved adaptor and valve.
3. Notify Calgary Airport Authority upon completion of use of hydrant.
4. User of hydrant may be charged with costs involved in back-to-service operational check, repairs required, hydrant drainage and winterization if required.
5. Proper City of Calgary approved back flow preventer or air gap fill connection required.

Your compliance with the above procedures is required.
