

CALGARY INTERNATIONAL AIRPORT

Birthday Party Shows

Living in Space Stage Show (All Ages)

Living in Space Stage Show (All ages)

Learn about life in microgravity! With supporting video examples from Shuttle Missions, and the International Space Station, our energetic instructor calls upon the audience's knowledge and participation to address the most intriguing topics about life in space: eating, sleeping, exercise, bathing, and even going to the bathroom! (30-45 minutes)

Rocket Building (All Ages) NUMBER ONE STAFF PICK

Your kids and their guests will get a chance to become rocket scientists-in-training as they work collaboratively to design, build, test and launch a simple rocket with Alka-Seltzer and water. Points of interest include aerodynamics, forces, basic chemistry, creativity and most importantly —teamwork. (45 minutes)

Monster Machines (Ages 6-10)

Your kids and their guests will explore the world of a newly discovered planet Qanik in a short presentation before they will begin their team work. As a group they will problem solve and try to build a functioning machine out of K'nex that will aid in the development of the new planet. Some examples are ice boats, cranes, rovers and windmills. (45 minutes)
